

Qualitative. High performance. Market leading

TWE is the world's leading supplier of OCP bandages. We deliver cost-effective, high-quality and compliant solutions for the whole healthcare sector.

Medical proofed

Cost effective

Market leader

Customized

Through research, further development, and substantial know-how, our division is growing continuously with and for our customers.

The key facts.

TWE nonwovens are used in 2 main applications

- wound dressings (for light and acute wounds)
- treatment of chronic wounds.

Our nonwovens generally protect the skin under plaster and pressure dressings and are hypoallergenic. We use medically approved fibers like viscose, polyester or polypropylene, which are manufactured in specially operated facilities under particularly strict hygiene regulations. The weights varies from 80-110 g/m² and the rolls can be packaged individually foil sealed or as bulk packs with or without printing.
